

Chapter-5 / Practice set.

DATE / /

1) write a Program to create a dictionary of Hindi words values as a their english translation provide user with an option to look it up!

2) write a Program to input eight numbers from the user and display all the unique numbers (once.)

3) Can we have a set with 18(int) and "18"(str) as a values in it?

4) what will be the length of following set S:

S = set()

S.add(20)

S.add(20.0)

S.add("20") \Rightarrow length of S after these operations?

5 ~~create~~ $S = \{ \}$

what is the type of S ?

6 create an empty dictionary. Allow 4 friends to enter their favourite language as values and use keys as their names. Assume that the names are unique.

7 If names of 2 friends are same, what will to the program in Problem 6?

8 If language of two friends are same what will happen to the program in Problem 6?

9 ~~Can~~ Can you change the values inside a list which is contained in set S ?

$S = \{8, 7, 12, "Kaif", [1, 2]\}$
